

### **Accommodation Accreditation**

**This Union notes** that existing accommodation schemes do not place emphasis on student feedback and rely on primarily physical conditions.

**This union believes** that the student union has a role to play in ensuring that its members can make an informed choice with accommodation providers.

**This union resolves** that an accreditation scheme based on an annual accommodation survey be conducted by the union based on student feedback and one which places emphasis on service and quality. The results of this survey should be displaced online to students before the first housing fayre of the academic year.
